

Trend Micro™

InterScan VirusWall™

Stop threats and increase productivity with all-in-one security for your Internet gateway

Designed for medium businesses, InterScan VirusWall stops spam, viruses, spyware, phishing and inappropriate content at your Internet gateway. It reduces disruption to your business and helps you regain end user productivity with top-rated spam protection and built-in URL filtering. Leveraging the industry-unique Trend Micro™ Smart Protection Network™, InterScan VirusWall stops web and email threats before they can impact your business, preserving your IT investments and network performance.

KEY FEATURES

All-in-One Web and Messaging Gateway Security

- Prevents viruses, spyware, spam, phishing and botnet attacks from entering your network through vulnerable Internet gateway access points
- Reduces unwanted email using a combination of in-the-cloud and gateway scanning, providing higher detection rates and lower false positives
- Blocks harmful web and email downloads with multi-level malware protection, preserving privacy and preventing loss of confidential data

Stops Spam and Other Threats Before the Network

- Effectively stops spam and other unwanted email with top-rated antispam technology as demonstrated in independent tests
- Protects against blended threats and zero-day attacks, and prevents viruses from spreading through the network
- Leverages the in-the-cloud threat intelligence of the Smart Protection Network to stop web and email threats before they can consume network resources

Protects Against Today's Evolving Web Threats

- Industry-leading web reputation database continually correlates reputation scores to strengthen security during web browsing and prevent exposure to malicious URLs
- Active Directory support allows URL filtering policies to be set for specific users and groups including HTTP, SMTP, & POP3 users
- Blocks malicious URLs embedded in email (spam and otherwise)

Simplifies Management, Increases Visibility

- Easy to deploy and manage from a single web-based console
- Detailed reports provide visibility into user activity and security vulnerabilities
- Complements existing firewall and VPN solutions with an essential layer of gateway defense

SOFTWARE

Protection Points

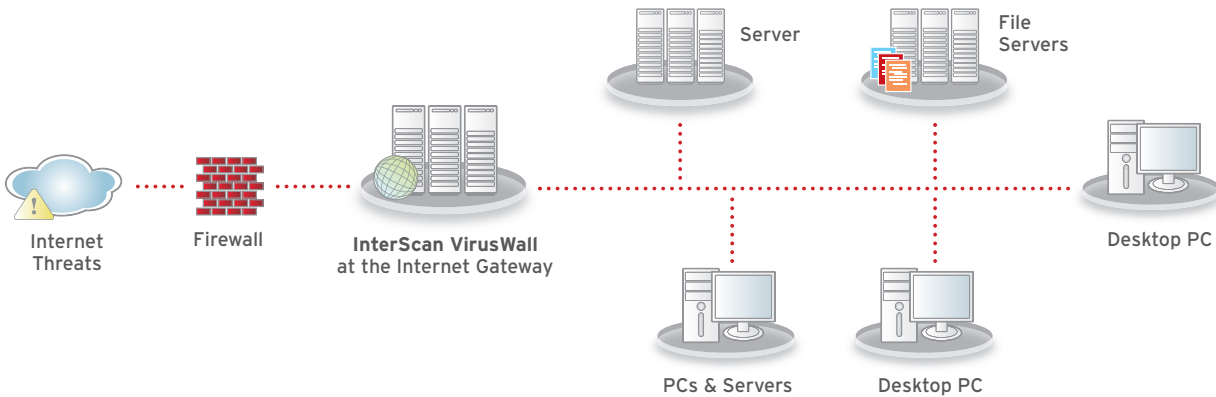

- Messaging Gateway
- Web Gateway

Threat Protection

- Spam and phishing
- Inappropriate content
- Web threats
- Spyware and rootkits
- Viruses and trojans

KEY BENEFITS

- Delivers immediate protection with in-the-cloud threat intelligence
- Effectively stops spam and other threats before they impact network resources
- Saves time with Active Directory support for creating user and group policies
- Provides visibility into threat actions and user activities with detailed reports
- Increases employee productivity with user-based URL filtering

InterScan VirusWall takes advantage of in-the-cloud threat intelligence from the Smart Protection Network to stop web and email threats at the gateway, before they can harm your business.

MINIMUM SYSTEM REQUIREMENTS

For the latest system requirements please refer to the InterScan VirusWall Product Page at: <http://us.trendmicro.com/us/products/mb/inter-scan-viruswall/index.html>

CPU

- Intel™ Pentium™ 4, 1.6GHz or higher

Memory

- 2GB RAM recommended, with HTTP VirusWall URL filtering enabled

Hard Disk

- 4GB for the target program drive
- 20GB for the target program drive and quarantine files, folders, and installation process

Note: The ISVW 7.0 installation program checks the free disk space on the system and target drives. If your server lacks the minimum disk space, the installation process will not proceed.

Operating System

- Windows™ 2000 Server/Advanced Server with service pack 4
- Windows Server 2003 Standard Edition/Enterprise Edition/Web Edition with service pack 2 (32 and 64 bit)
- Windows Server 2003 R2 with latest service pack (32 and 64 bit)
- Windows 2008 server Enterprise Edition/Standard Edition (32 and 64 bit)

Web Management Console

- Microsoft® Internet Explorer 6.0 and above
- Mozilla Firefox® 2.0 and 3.0

ALTERNATIVE SOLUTIONS

- **InterScan™ Messaging Hosted Security**
- **InterScan™ Messaging Security Virtual Appliance**
- **InterScan™ Web Security Virtual Appliance**

EXPAND YOUR PROTECTION

- **NeatSuite™ Advanced** is an endpoint-to-gateway solution suite
- **Client/Server/Messaging Suite** integrates client, server and messaging security
- **OfficeScan™ Client-Server Suite** protects desktops, laptops, servers, and smartphones
- **SecureSite** safeguards websites from hackers and threats
